Campers eGt Property Around Berlin Pond and Will Protect Interests.

The campers interested in the sale of land around Berlin pond, who appeared before the city council Wednesday evening to see if they were to be remunerated by the city, should it purchase the land on which their cottages are located, have things their own way now, as a deed of the Hayward estate was yesterday passed between Mrs. Hayward and these campers. While they feel that the property should ultimately become the possession of the city, they leased the land and erected cottages thereon and want some remuneration for the money expended. They state that they have no desire to overcharge the city if it buys the place, and are willing to sell it at a reasonable price, or even at a sacrifice, so long as their own interests are protected. The campers interested are the C. P. Pitkin estate, Dr. C. E. Chandler, C. F. Lowe, F. A. Howland, Henry L. Farwell, J. G. Brown, Ralph B. Denny and John P. Adams.

A daughter, Dorothy Maxine, was born Friday, Feb. 3, to Mr. and Mrs. O. W. Smith.

The safe of Allen brothers, which went down in the Rialto building fire, was found yesterday intact, in the water near the bank. It contained \$50 in money and some valuable papers. A number of barber shop tools, hair-tonsic and face wash, which came from the Jangraw shop, were found and considerable of the glassware was not broken. The debris is nearly removed. Work was somewhat delayed yesterday because of the water.

Since the resignation of F. J. Browncombe as superintendent of the Montpelier schools, which goes into effect next June, the school board has received 300 applications for the position.

Physicians have decided that an operation must be performed on the leg of Odell Mason in order to have it properly knitted together. Mason slipped under a moving freight car last Sunday at Montpelier Junction, while uncoupling cars, and one leg was broken. He was taken to the Heaton hospital. A careful watch has been kept of his condition and X-ray pictures of the fracture show that the bone does not stay in place. An incision will have to be made and the ends connected, so the bones will knit properly. He will probably not be able to use the leg for nearly a year.

The Vermont Power company held its annual meeting yesterday at the offices of the Consolidated Lighting company and elected these officers: President, A. D. Bennett; Port Huron, Mich.; vice president, A. W. McElmont, Jackson, Mich.; treasurer, Kirk Lathrop, Detroit, Mich.; secretary and clerk, C. H. Senter, Montpelier; H. H. Bennett, assistant treasurer. The directors reappointed F. N. Kozell general manager.

The annual report of Heaton hospital trustees shows that 430 patients have been received there the past year. There were 208 operations and 18 deaths at the institution.

SOUTH CABOT.

George Reed and Edgar Hawes of North Montpelier visited at Ira Reed's over Sunday.

Nathan Plumley came near having a serious accident last week Thursday. While working in the woods, a tree got lodged and while trying to get it down, it struck him on top of the head, cutting a gash two inches long. Dr. Warren was called and sewed it up for him.

Miss Rosie Bouldry is quite sick with an attack of appendicitis.

What might have been a serious accident occurred Tuesday, when a colt belonging to Leon Dow ran from C. E. Scribner's as far as W. O. Southwick's, with Mr. Dow's little daughter, Mildred, alone in the sleigh. When the colt reached Mr. Southwick's place, it jumped over the barn yard fence, throwing the girl from the sleigh into the soft snow, so that she was not injured. The sleigh was badly smashed.

Easy Lessons in Civil Government.

Yes son, the legislature of Vermont is a great body—upwards of three hundred members, including pages and floor sweepers.

Yes son, the legislature does things—many peculiar things.

Yes son, a legislator is the servant of the people—up to the time he secures his election.

Yes son, the legislature believes in economy—it has spent a good many thousands of dollars in discussing it.

Yes son, the legislature is praised for a few things—final adjournment, for instance.

Yes son, this is a free government, that the people pay for, and there are no kings and queens in the legislature—but usually there are several jacks.

Yes son, there are a good many people who know just what a legislature should do—but fortunately they are never elected to serve it.

What's that? Do legislators know everything? Go and ask some one who's had an attack of it—and then go to bed.—Northfield News.

I tried three doctors and one specialist but all of them said he could not be cured, but Dr. Miles' Restorative Nerve and Dr. Miles' Nerve and Liver Pills made a complete cure. He is now hale, hearty and gay. It has been three years since he had the last spell. I shall give Dr. Miles' medicines praise wherever I go. You are at liberty to use this letter as you see fit and anyone writing to me I will gladly answer if they enclose stamp for reply."

AMUSEMENT NOTES.

Victor Herbert's Greatest Popular Hit, "The Red Mill."

With a record of nearly twenty musical plays to his credit, Victor Herbert stands to-day as not only the most successful, but the most prolific composer in America, whose every effort has developed an artistic and financial success, and who has done more to elevate musical plays to a scale of refinement than any living writer, his compositions being found in all music rooms throughout the civilized world. "The Red Mill," which is to be presented at the opera house next Tuesday, Feb. 14, by Martin & Emery company's organization, has been considered his greatest popular hit. It was produced at the Knickerbocker theatre, New York City, where it remained the entire year, which was followed by engagements of three months each in Chicago, Philadelphia and Boston, and so great was the demand to see it that seats were placed on sale for months in advance. The books and lyrics of "The Red Mill" are by Henry Blossom. Holland is the country selected by the authors for the scenes and the action of the story, which readily lends itself to picturesque scenery, quaint costumes and the peculiar characteristics of the country, these being relieved by the introduction of English, French and American tourists.

SCENE IN THE FAMOUS MUSICAL COMEDY SUCCESS, "THE RED MILL," AT THE BARRE OPERA HOUSE TUESDAY, FEB. 14.

Not For Sale.

I'd like almighty well to have more money than my purse contains; I do my very best to save, but still they get my hard-won gains; I walk to save a nickel when the winds of winter fiercely blow; I wear the hat and coat and vest that first I wore two years ago; I long for money; it is hard for me to keep my bark afloat, But no man has sufficient cash to buy my vote.

I long to make my children glad, to give them much they are denied; If I had money all the things they want should quickly be supplied; It saddens me to hear them ask for what I can't afford to buy; They cannot understand and come to innocently ask me why; I see the patches they must wear and feel a lump come in my throat; But not a man is rich enough to buy my vote.

The little home on which I've paid installments for a dozen years May never be my own; my breast is often filled with doubts and fears; I do not know how I shall raise the interest when it is due; There is a doctor's bill to pay; the dollars I have saved are few; My shoes are run down at the heels, I wear a threadbare overcoat, But no man has sufficient cash to buy my vote.

Fire Protection in Montpelier.

The Barre Times on Tuesday night called attention to the responsibility which rests upon Montpelier, as the capital of the state, to maintain efficient fire protection, saying: ""

This is a fair and legitimate presentation of a subject that is of very great importance. For our own safety we should have, of course, fire protection that is adequate, but the fact that the State House is located here lays upon us the responsibility of protecting the capital with its valuable contents in a manner as thorough as that which any other city can afford.

It is true that there are many demands upon our revenues. We must complete and furnish the city hall. We must have a new high school. And yet, as we may, every fire of any magnitude shows unmistakably the need of a paid fire department and points unerringly to the possibility at any time of a disastrous fire due entirely to inability to respond immediately to an alarm. We are running a heavy risk every year that we postpone the establishment of a paid department. We may get along safely with our present equipment for a long time and we may pay a heavy price any day for our neglect. It is not very safe or very economical to gamble with fate.

In discussing the financing of the city hall problem it is well to consider the possibility of the sale of the Golden Fleece property. A sale of bonds would be the necessary method, probably of providing means for erecting a high school building. The method outlined by a citizen in Tuesday's Journal shows that the cost of a combination hose and chemical truck would be \$2,200, with

Bald? Going to neglect your hair until it leaves you? Going to neglect your dandruff until you are bald? Certainly not. Then consult your doctor. Ask him about Ayer's Hair Vigor. It never stains or changes the color of the hair.

\$700 more for a pair of heavy horses. The sum of \$800 could be saved by eliminating twenty call men and there would be the saving of the hiring of a span of horses. Such a change would not involve a heavy addition to our present annual expenditure, and it would mean greater safety for our property and lower insurance rates for our citizens.

For the protection of the property of our citizens as well as that of the state we need a paid department and the matter demands the careful attention of our citizens.—Montpelier Journal.
